## SPECIAL BULLETIN

### Capital Investment Allowance

The Wireline Competition Bureau [released](#) the final Capital Investment Allowance (CIA) for RoR carriers choosing the Connect America Fund Broadband Loop Support (CAF BLS) path under the FCC's *RoR USF Reform Order*. The CIA will first apply to investment made in 2017 (i.e., 2017 CAF BLS and 2019 HCLS payments).

The results released replace the previously released illustrative results (see October 4, 2016 Special Bulletin) and reflect final 2015 data, including the RoR carrier deployment obligations.

USAC has published the final results and additional information on its [website](#), including methodology documentation and a template that can be used to replicate the final results (useful for testing alternative investment plans).

Companies should review the final results and, if necessary, analyze investment plans using the supplied template. A spreadsheet containing the final results is attached to this Special Bulletin for your convenience.

Please let us know if you have any questions.
