SPECIAL BULLETIN

Number Portability Administration Center *Registration Reminder*

The FCC's Wireline Competition Bureau released a [Public Notice](#) yesterday reminding all entities that use the Number Portability Administration Center (NPAC) to register with the new Local Number Portability Administrator (iconectiv). The FCC awarded the LNPA contract to Telcordia Technologies, Inc. d/b/a iconectiv in 2015 and the industry has been in the process of migrating from the current LNPA, Neustar.

If a telecommunications carrier utilizes a service bureau, the WCB encourages such entities to contact their service bureau to ensure that all providers are registered and are ready for the transition.

According to the Public Notice, the deadline for service providers to register, if they plan on testing interfaces, is August 31, 2017. If a service provider plans no interface testing, then the registration deadline is October 31, 2017. The cutover to iconectiv is scheduled to start in March 2018 and be complete in May 2018.

Information about NPAC, the transition, and registering with the new LNPA can be found [here](#).

Please let us know if you have any questions.
